Twitter Hyperactives* (1/Sloth)

Twitter Gamblers* (1/Greed)

Twitter Sedated Users* (1/Wrath)

About the Anticartogram & the Data

We used the inverse function (1/x) in order to build those anticartograms. Thus, the area of each US State is inversely proportionnal to the number of Tweets included in each state.

USA Reference Map

Those anticartograms are based on approximately 430,000 Tweets harvested this year by a list of keywords ; between June 26 & October 30. You may also note that we have only selected the 49 main states of the North America.

* Note : this only reflects the author's interpretation of each «antideadly sin»

** Note : «antidevilish» does not necessarily mean «virtuous» or «saintly»
